**Footnotes:**

<sup>1</sup>Area: Metropolitan statistical areas (MSAs) are designated by the Office of Management and Budget. MSAs generally cover one or more counties or county equivalents or New England City and Town Area (NECTA) in the six New England states. Areas that cover parts of states are listed in Roman font under the state in which the largest part of its population lives and also in italic font at the bottom of the listings for other states covered by the MSA or division. There are 11 MSAs with more than 2,500,000 people. Employment in these MSAs is presented in two or more divisions or divisions rather than for the MSA as a whole. See U.S. Census Bureau for definitions of MSAs and divisions.

<sup>2</sup>Industry: The Bureau of Labor Statistics (BLS) reports employment for construction, mining and logging combined for six states, the District of Columbia and MSAs in which mining and logging have only a small number of employers. To facilitate comparisons between MSAs and the states, AGC has calculated combined employment change in states for which BLS reports the industries separately. Because MSA data
